

GTA MARKET NOTIFICATIONS

Notice No. 05 of 23 — 17 April 2023

TOPIC: IAN 2023-15: Plant Export Operations - PEMS enhancement

DISTRIBUTION: GTA Members – primary contact list. Please circulate to all appropriate internal parties

1. Purpose

This Industry Advice Notice (IAN) is to advise all users of the Plant Export Management System (PEMS) of an upgrade to the system on 15 April 2023.

2. Summary of changes and key points

On 15 April the PEMS system will be enhanced with the following:

RFP Net Metric Weight

- The total RFP Net Metric Weight value will now be displayed under the “RFP Details” section of the Grain and Plant Product inspection record. This value will be extracted from the RFP details held in EXDOC.
- Each inspection line weight will be displayed under the “Results” section.

Commodity Declaration

- Authorised Officers (AOs) will now need to complete the “Declaration” in the “Results” section, confirming the presented commodity matches the commodity listed in the extracted RFP prior to entering inspection results.
- The system will display an error if the inspection commodity and RFP commodity do not match upon “Submitting” the inspection record.
- If there is an error, AOs will need to liaise with the exporter or EDI user to align the RFP commodity with the commodity inspected.
