

GTA MARKET NOTIFICATIONS

Notice 5 of 21 - 12 April 2021

TOPIC: *GPA Training Meeting*

DISTRIBUTION: GTA Members – primary contact list. Please circulate to all appropriate internal parties.

GTA has been asked to raise awareness of this GPA meeting. At this stage GTA has only limited knowledge of this initiative. Grain storage site operators should make their own assessments suitable to their particular circumstances.

Grain site delivery summit

Join Grain Producers Australia for a lunchtime discussion on improving inductions for grain site delivery

[View Flyer](#)

On behalf of Grain Producers Australia, we would like to invite you and your colleagues to attend a grains industry forum to discuss grain site delivery induction.

Friday 16 April 2021 12.30 pm AEST (12 pm ACST, 10.30 am AWST)

GPA is hosting a meeting with grain handling companies to discuss the implementation of a single grains industry induction tool for growers to access a number of sites and companies. Growers around Australia work with a number of grain handling and trading companies, requiring them to be inducted into each site risks and procedures.

The support for a recognised industry solution for a delivery induction will ensure consistency and simplicity for growers to access a site, while also ensuring the company communicates the necessary safety and familiarisation information.

GPA has developed an online training platform, GPA Training. The platform has a range of information to support improving the training and education of the Australian grains industry. The course, Grain Site Induction, is currently available on the GPA Training website.

Please register via the [following link](#).

We look forward to seeing you on 16 April.
