Re: Proposal P1055 - Definitions for gene technology and new breeding techniques

Thank for the opportunity to make a submission in response to the 2nd consultation on Proposal P1055 - Definitions for gene technology and new breeding techniques.

1. About Grain Trade Australia

[Grain Trade Australia](#) (GTA) is a national member association and is the focal point for the commercial grain industry within Australia.

GTA has over 290 organisations as members. Their businesses range from regional family businesses to large national and international trading/storage and handling companies who are involved in grain trading activities, grain storage, grain marketing advisory services, processing grain for human consumption and stock feed milling. GTA Members are substantial employers, from the farm gate through to end point consumption, and notably in rural and regional Australia. Australia's grain is exported by GTA members. A full list of GTA Members is annexed to this submission.

GTA's core focus is to 'facilitate trade' in the Australian grain industry. It's products and services, including the Australia Grain Industry Code of Practice, provides a self-regulatory framework across the grain industry to facilitate and promote the trade of grain within the Australian grain value chain.

GTA's Plant Breeding Innovation Committee provides advice and input in relation to new breeding technologies (NBTs). In relation to plant breeding innovation, GTA has developed the:

- [Market Choice Framework for GM Crops](#) (built on the canola industry's Market Choice Framework developed in 2008); and
- [Grain Industry Stewardship Framework for New Technologies](#) where Schedule 1 deals with NBTs.

These tools have been developed to ensure the introduction of these technologies into the supply chain is undertaken in a manner that does not disrupt trade.

GTA is also actively involved in industry discussions on these issues globally via membership of the International Grain Trade Coalition (IGTC), with harmonising of regulations a key focus.

P1055 proposal from FSANZ is another important step in ensuring alignment across the Australia's regulatory environment to assist the commercial path to market for these technologies.

Introduction

The use of next-generation plant breeding techniques (NBTs) has the potential to deliver significant benefit to the grains industry through driving innovation and productivity.

GTA welcomes the FSANZ Proposal P1055 to amend and clarify the definitions for 'food produced using gene technology' and 'gene technology' in the Australia New Zealand Food Standards Code (the Code). GTA's previous submission supported the need to future proof the Code in relation to products from NBTs and to regulate foods according to the risk they pose.
