RE: Covid-19 Trade Disruptions and Grains Supply Chain Engagement

Dear Minister,

I am writing to raise your awareness of disruptions that are emerging in the global trade of grain, due to Covid-19 impacts on supply chain, shipping and payment processes.

Increasingly the international grain trade is concerned that escalation of these disruptions, which if not effectively managed, will lead to blockages at origin and destination ports, and cash flow and credit issues for business. This will affect the trade's ability to transact, and potentially lead to shortages of products for food and feed processors that are necessary to meet consumer requirements. As the Australian grain industry is heavily focussed on export to multiple countries across the globe, the consequences will be significant.

To better prepare Government and industry to manage any consequences of trade disruption in the grain supply chain, I would like to suggest an approach to managing the Covid-19 situation that includes government engagement and direct consultation with the post-farm gate sector.

1. About GTA

GTA is a national trade association/peak body and is the focal point for the commercial grains industry. The role of GTA is to provide a framework across the Industry to facilitate and promote trade. GTA Members are responsible for the operation of the overwhelming part of the Australian grains supply chain, including the vast majority of all grain contracts, grain storage and freight movements made each year in Australia and all bulk exports of grain. GTA Members are drawn from all sectors of the grain value chain from production to domestic end users and exporters. GTA has over 270 organisations as Members. Their businesses range from regional family businesses to large national and international companies involved in grain marketing, grain storage, food and feed milling. A list of GTA Members is attached., and our website is www.graintrade.org.au

GTA is an active member of the International Grain Trade Coalition (IGTC), which is a not-for-profit association bringing together around 8000 businesses in 85 countries, working to achieve a commercial and regulatory environment supportive of trade that avoids disruptions in the international trade of grain (including oilseeds and pulses). Through our active participation in the IGTC, GTA is able to bring these global issues to local attention and also provide Australia's practice and perspective to our trade partners, global forums and Governments of other grain trade nations. Significant discussions at IGTC at which GTA has been represented have raised many of the concerns of the international grain trade on potential supply

disruptions and most IGTC members have been actively involved in discussions with their governments to develop trade enabling solutions.

2. Trade Disruptions

During these unprecedented times it is important that all governments seek to avoid disruptions in the international trade of grain. We recognise the efforts of the Australian and international governments who have worked rapidly to find temporary solutions to deal with the implications of the Covid-19 pandemic that are beyond their control, including staff shortages, lockdowns, home working and other disruptions.

With current restrictions on air transport and courier services, an urgent issue that has emerged (and is likely to escalate) is the impact on the timely and effective exchange of documents that are crucial to underpin the international grain trade and ultimately, payment for goods. This includes all documentation and processes necessary to complete an international grain transaction, including certificates such as phytosanitary, supervision, fumigation and country of origin certificates; bills of lading; and bank custody documentation.

In terms of government-issued documents, the phytosanitary certificate is of primary importance. We are already seeing occurrences where this (and other documents) have led to delays in vessel clearance, leading to delays in shipment and processing for payment within banks.

GTA and IGTC also have been liaising with members to develop practical solutions to all commercially transacted documents. A key element of those transactions and processes are government issued (and clearance processes at destination by importing country) documents.

GTA fully supports the recent advice of the International Plant Protection Convention (IPPC) for countries “to be as flexible as possible” and we would encourage the Australian Government to be open to and promote with other Governments the following options for contingency measures as appropriate to avoid any unnecessary delays:

1. Maximise use of electronic exchange mechanisms to facilitate a “paperless” exchange of phytosanitary certificates.
 - As raised at the recent Plant Industry Consultative Committee meeting (GPPEICC) we note, with disappointment, that Australia has not been able to prepare for the IPPC ePhyto Solution, and strongly support and encourage the Government to ensure this is prioritised for development given its obvious benefits to improving trade.
2. Acceptance of scanned copies of documents with the agreement that originals will be supplied as soon as technically feasible. Auditing post-sail to ensure compliance, could be conducted to ensure appropriate rigour.
3. e-Validation of documents for example using a Sole Electronic Validation Code or QR code.
4. Physically send phytosanitary certificates with the consignments where necessary.
5. Allow printing of certificates at destination to be acceptable.

Since the Covid-19 outbreak GTA through IGTC and other sources has been gathering expertise from grain trade representatives around the world to work on documentation contingency planning and other issues to minimise trade disruption. We would be pleased to discuss this in further detail, given its significance to the Australian grain supply chain and exports.

3. Post-farm Gate Engagement

We acknowledge and support the work the Government and production sector groups have done to ensure the issues required to ensure grain production for the upcoming planting season are fully considered and effectively managed by Government and industry.

Further to this, the impacts on the international trade of grain (outlined above) have the potential to have a significant negative impact on the export of grain and grain related products from Australia. Should this occur, there will also be potential flow-on affects to the domestic trading of grain and the supply chain that is used to service both the domestic and export markets.

We have already seen “panic buying” of retail food goods. Should the supply chain be further disrupted, this places the smooth supply of grain and grain food products in greater doubt.

To assist the Government and the grain industry stakeholders along the supply chain to effectively manage all operations to ensure as few trade disruptions as possible, it is important that all impacts of the current situation on the entire supply chain are considered in any government/industry management strategy going forward during this crisis.

Moving grain through the supply chain for domestic consumption and export is a complex task. GTA considers that further direct representation and consultation of the post-farm gate sector will assist in fully analysing and understanding the complexities, as it is GTA Members that operate, and therefore have expertise, in the post-farm gate grains supply chain.

GTA encourages the Government to ensure that it has the mechanisms in place to receive the full perspective and suite of advice required to ensure the best outcomes for the industry and the broader economy. We respectfully suggest that this can be enhanced by direct consultation and engagement with the post-farm gate sector, facilitated through GTA.

GTA would encourage the Government to fully consider the issues raised in this letter, and welcome further engagement and discussion given the severity and importance of the Covid-19 situation.

Yours sincerely,

Pat O'Shannassy
CEO, Grain Trade Australia
